

ICCONS® PRODUCT SELECTION CHART

Compliance in accordance with AS 5216 as referenced in the NCC

FOR USE BY DESIGNERS, PRODUCT SUPPLIERS & CONTRACTORS

Concrete Anchoring Application

Note: NCC 2022 will be published on 1st October 2022 and can be referenced from this date forward for those wanting to use the new provisions.

NCC 2022 however comes into effect and will be adopted on 1st May 2023.

The ABCB, who publishes the NCC has approved AS 5216:2021 which becomes a primary reference in NCC 2022 superseding all references to AS 5216:2018.

*Safety critical applications are defined as fastenings where failure may result in collapse or partial collapse of the structure, endanger human life and/or cause considerable economic loss. Determination of a Safety Critical Application should be decided by the design engineer or person responsible for the installation.
