RANGE DOCUMENT

FOAMS SEALANTS ADHESIVES

Developed for ICCONS® Independent Dealer Network

Purpose-built exclusively for independent construction supply specialists, the ICCONS® Foams, Sealants & Adhesives range is designed to help our Dealer Network win on performance, margin, and exclusivity.

Independent dealers operate in a highly competitive environment where global brands and opportunistic suppliers dilute value through non-exclusive, direct-to-site and mass-retail channels. ICCONS® has always taken a different path.

*We have built a market-leading Foams, Sealants & Adhesives portfolio specifically to **protect the independent channel, strengthen your in-store offer, and give you a genuine point of difference others cannot replicate.***

Manufactured under ISO 9001 certified quality management systems, the ICCONS® range delivers consistent, professional grade performance across real Australian construction and trade applications. **Every product is formulated and packaged with practical job site demands in mind**, giving trades confidence on site and your team confidence at the counter.

Complete your offer with **ICCONS® Cartridge Caddy, a patented market first, all-in-one cartridge organiser** engineered for efficiency and cleanliness. With rapid cartridge access, integrated cap and nozzle cutting, and organised storage for accessories, **Cartridge Caddy reinforces ICCONS® commitment to smarter systems that add real value on site and in store.**

ROOF & GUTTER ULTIMATE 100% SILICONE SEALANT

ICCONS® Roof & Gutter Ultimate 100% Silicone is a neutral-cure translucent sealant designed for long-lasting performance on both metal & tiled roofing. Engineered for durability, it delivers a weatherproof, UV-resistant bond that stays flexible through changing temperatures & harsh outdoor conditions. **Conforms to ASI TS-001.**

TYPICAL APPLICATIONS

- Metal, tiled & Colorbond® roofing applications
- Gutters & downpipes
- Flashings & roof penetrations
- Skylights
- Air-conditioning units
- Metal ducting
- Sheet metal fabrication

SUBSTRATE

Suitable for most building substrates:

- Galvanised iron & steel
- Glazed & ceramic tiles
- Sheet metal
- Aluminium
- Glass
- Timber
- Concrete
- Various porous materials

ADVANTAGES

- Rapid curing
- Highly flexible
- Waterproof
- UV resistant
- Neutral curing
- Low odour
- Permanently elastic
- Excellent adhesion
- Non-slumping

GLASS & GLAZING ULTIMATE 100% SILICONE SEALANT

ICCONS® Glass & Glazing Ultimate 100% Silicone is one-part neutral-cure silicone sealant formulated for glass & glazing applications. It offers outstanding weatherproofing & temperature resistance, providing long-term protection for glass façades, windows & sanitary joints. The sealant has excellent primeless adhesion to most building materials & remains permanently elastic.

TYPICAL APPLICATIONS

- Glass & glazing
- Windows & doors
- Facade Systems
- Window & door system joints
- Interior & exterior glass decoration
- Feature panels
- Sealing between PVC, timber & metal profiles
- Solar panel perimeter sealing & junctions

SUBSTRATE

Suitable for building substrates:

- Glass
- Powder coated surfaces
- Glazed & ceramic tiles
- Aluminium
- Timber
- Concrete
- Stainless Steel
- Various porous material

KITCHEN & BATHROOM SILICONE SEALANT

ICCONS® Kitchen & Bathroom Silicone is a premium, neutral-cure, sanitary silicone sealant. Its neutral-cure formula is low odour, anti-fungal & mould resistant. It provides long-term UV stability & remains permanently elastic to accommodate joint movement. Ideal for kitchens & bathrooms, this silicone offers excellent adhesion to most surfaces.

TYPICAL APPLICATIONS

- Kitchens
- Bathrooms
- Bathtubs
- Shower bases
- Shower screens
- Toilets
- Sinks
- Vanities
- Plumbing fixtures
- Air-conditioning systems

FORMWORK SILICONE SEALANT

ICCONS® Formwork Silicone is a neutral-cure, non-corrosive silicone sealant designed to seal form ply sheet edges, joints & gaps in formwork applications. It provides a waterproof seal that prevents moisture loss or slurry/grout leakage during concrete placement.

TYPICAL APPLICATIONS

- Sealing gaps around junctions & joints in formwork
- Preventing slurry/grout leakage during concrete curing
- Providing sealed formwork surface for a clean finish in formwork applications

SUBSTRATE

Suitable for most building substrates:

- Timber
- Plywood
- Concrete
- Masonry
- Steel
- Aluminium

ADVANTAGES

- Rapid curing
- Highly flexible
- Waterproof
- Neutral curing
- Low odour
- Excellent adhesion

GAP FILLER SEALANT

ICCONS® Gap Filler is a premium one-part, water-based sealant designed for repairing cracks & sealing gaps. It provides excellent adhesion to most surfaces, cures to a flexible, paintable finish & remains waterproof after curing. The solvent-free formulation is easy to apply.

TYPICAL APPLICATIONS

- Repairing cracks in walls, skirting boards & doors
- Sealing between plasterboard panels, cornices & ceilings
- Joints on window sills, plinths & walls

SUBSTRATE

Suitable for porous building materials including:

- Plasterboard
- Timber
- MDF / particle board
- Plywood
- Masonry
- Fibre cement sheet

ADVANTAGES

- Solvent-free
- Water-based
- Paintable within 20 minutes

ALLROUNDER® SEALANT & ADHESIVE

ICCONS® ALLROUNDER® is an ultimate single component, STPE polymer adhesive sealant. Suitable for both interior & exterior bonding, sealing & caulking applications, ALLROUNDER® remains flexible, mildew resistant, UV resistant, & solvent free. ALLROUNDER® has an excellent adhesion on almost all substrates.

TYPICAL APPLICATIONS

- Interior & exterior bonding
- Interior & exterior sealing
- Transparent bonding & sealing application

NAIL GUN CONSTRUCTION ADHESIVE

ICCONS® Nail Gun Construction Adhesive is a premium ready-to-use synthetic construction adhesive designed for high-strength bonding of a wide variety of materials. It bonds most substrates & can replace mechanical fasteners in some applications. The adhesive provides a gap-filling capability & offers a durable bond suitable for interior & exterior use.

TYPICAL APPLICATIONS

- All purpose bonding in construction & DIY
- Alternative to mechanical fasteners

SUBSTRATE

Bonds to various porous & non-porous surfaces:

- Wood
- Concrete
- Brick
- Particle board
- Glass
- Copper
- Aluminium
- Steel
- Most plastics

ADVANTAGES

- Excellent bond strength
- Can replace mechanical fasteners
- High initial tack
- Suitable for uneven surfaces

FOAMFLO® F750 EXPANDING FOAM

Straw Delivery System.

FoamFlo® F750 is a professional-grade, moisture-curing polyurethane expanding foam designed for efficient filling, sealing and insulating of gaps and cavities. Suitable for internal and external use, it delivers high expansion, strong adhesion and reliable long-term performance.

Once cured, FoamFlo® F750 can be cut, sanded, plastered and painted. It provides effective sealing to help reduce noise, improve insulation and block dust, insects and minor pests from penetrations.

TYPICAL APPLICATIONS

- Filling holes, gaps and voids
- Sealing and connecting joints
- Insulating service penetrations
- Reducing the impact of thermal bridging
- Sealing thermal and acoustic insulation boards
- Gluing and fixing window sills, sidings and plasterboard details
- Sealing roof-to-wall junctions
- General construction, renovation and maintenance work

SUBSTRATE

- Concrete
- Masonry and brick
- Timber
- Plasterboard
- Metal
- PVC and most plastics

ADVANTAGES

- High-volume expansion for efficient gap and cavity filling
- Excellent adhesion to most common building substrates
- Strong mechanical properties once cured
- Dimensional stability with no shrinkage
- Very good yield per can
- Helps reduce noise transmission
- Contributes to thermal insulation performance
- Suitable for internal and external applications

Part No.	Description	 Qty.	 Qty.
F750	750ml - FoamFlo® Polyurethane B3 expanding foam straw nozzle manual delivery system	1	12
FOAMFLO-CLEANER	500ml - FoamFlo® Cleaner for PU foam and tool	1	12

FOAMFLO® FT750 EXPANDING FOAM

Trigger Tool Delivery System

FoamFlo® FT750 is a professional-grade, moisture-curing polyurethane expanding foam designed for precise, controlled filling and sealing. Used with the FoamFlo® FT-PROTOOL, it provides adjustable flow control for accurate application, reduced waste and improved efficiency compared to manual foams. With low post-expansion and low curing pressure, it is suitable for internal and external use, offering reliable sealing, insulation and long-term dimensional stability. Once cured, it can be cut, sanded, plastered and painted, with strong adhesion and no shrinkage.

TYPICAL APPLICATIONS

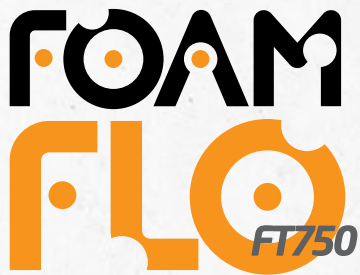

- Sealing window and door frames
- Sealing thermal and acoustic insulation boards
- Reducing the impact of thermal bridging
- Sealing and connection of joints
- Insulating service penetrations
- Filling gaps and large cavities
- General construction, installation and renovation work

SUBSTRATE

- Concrete
- Masonry and brick
- Timber
- Plasterboard
- Metal
- PVC and most plastics

ADVANTAGES

- Precise, controllable application when used with FT-PROTOOL
- Low post-expansion for accurate filling
- Low curing pressure
- High yield with reduced waste
- Strong adhesion to most substrates
- Dimensional stability with no shrinkage
- Suitable for internal and external use

Part No.	Description	 Qty.	 Qty.
FT750	750ml - FoamFlo® Polyurethane B3 expanding foam for tool delivery system	1	12

FT-PROTOOL	FoamFlo® Pro dispensing tool - Teflon coated Stainless Steel barrel & needle, aluminium adjuster for easy control	1	n/a

FOAMFLO® FIRE EXPANDING FOAM

Straw Delivery System

FoamFlo® FIRE is a professional-grade, fire-retardant polyurethane expanding foam that cures with moisture in the air. It is designed for filling and sealing gaps and cavities where fire performance, insulation and reliable adhesion are required.

FoamFlo® FIRE offers strong adhesion to most building substrates, does not shrink once cured and also provides effective thermal and acoustic insulation.

GENERAL APPLICATIONS

- Filling gaps and large cavities
- Sealing service penetrations
- Thermal insulation
- Acoustic insulation and noise reduction

FIRE RESISTANT APPLICATIONS

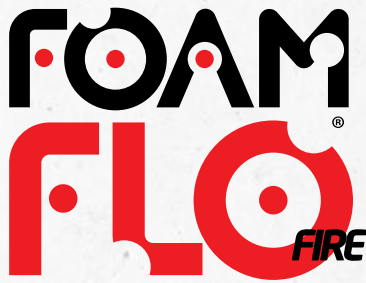

- Linear gap sealing in concrete block and concrete walls
 - Sealing vertical penetrations where fire performance is required
 - Fire-rated sealing in construction and service installations
 - FoamFlo® FIRE has been tested as a linear gap sealant in concrete block and concrete walls.
- Contact ICCONS® for fire test report details

SUBSTRATE

- Concrete
- Brick and masonry
- Timber
- Metal

ADVANTAGES

- Fire-retardant expanding polyurethane foam
- Strong adhesion with no shrinkage once cured
- Good thermal and acoustic insulation properties
- Class B1 reaction to fire
- Suitable for vertical penetrations only
- Fire resistance up to **EI 240***

Part No.	Description	 Qty.	 Qty.
FOAMFLO-FIRE	750ml - FoamFlo® Fire Retardant expanding PU foam- straw nozzle delivery system	1	12
FOAMFLO-CLEANER	500ml - FoamFlo® Cleaner for PU foam and tool	1	12

*Fire resistance tested according to EN 1366-4 and rated according to EN 13501-2.
**For fire rated applications please ensure that the fire technical data contained in ICCONS® Technical Data Sheet is reviewed and approved by a fire design consultant prior to using the product.
Visit www.iccons.com.au for full details.

FOAMFLO® CLEANER

For Clean-Up of Expanding Foams

FoamFlo® Cleaner is an acetone-based solvent designed for the effective cleaning of uncured polyurethane expanding foams. It is ideal for maintaining FoamFlo® application tools and equipment, helping to extend tool life and ensure reliable performance.

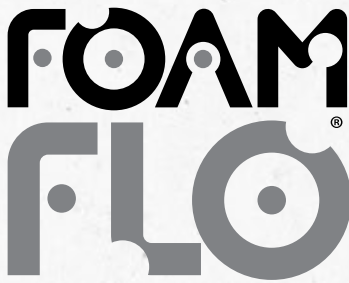

FoamFlo® Cleaner dilutes and removes uncured foam residue and is CFC free.

TYPICAL APPLICATIONS

- Cleaning FoamFlo® trigger tools and straw applicators
- Removing uncured expanding foam from tools and equipment
- General maintenance of FoamFlo® foam application tools

ADVANTAGES

- Effectively dilutes and removes uncured foam
- Suitable for cleaning FoamFlo® FT750 application tools
- Helps maintain and extend tool life
- Fast-acting acetone-based solvent
- CFC free

Part No.	Description	 Qty.	 Qty.
