

ICCONS® Supplies a range of fasteners for the steel building industry. Structnail® is a specialised range of pins used extensively on numerous applications around the building site. Whether installed in the factory or onsite, ICCONS® has a fastener for you to provide a efficient, fast and cost effective installation solution

LINTELS

FASTENER: SNC2359NG

TOOL:

SNTJN65 or 15° Coil Nailer

CLADDING

FASTENER:

SNC2509NG, SNC2639NG

100L:

SNTJN65 or 15° Coil Nailer

FLOORING

FASTENER: SNC2359NG

TOOL:

SNTJN65 or 15° Coil Nailer

COMPLETE RANGE

- 6-8 Times Faster Installation
- Approved for Installing Cladding Systems
- Approved for Bracing Systems
- Independently Engineered for Compliance
- Proprietary Coating Compliance with Bluescope®
- Meets AU/NZ Standards
- Fixing Timber to Steel Buildings
- Fixing Steel to Steel Applications

BRACING

FASTENER: SNC2359NG

TOOL:

SNTJN65 or 15° Coil Nailer

BATTENS (steel or timber)

ON-SITE SUPPORT

ICCONS® rapidly expanding national site support team is constantly working to improve training and education for contractors, project managers and design engineers etc. This program is an exciting new initiative driven from ICCONS® in each state and offers;

- Product demonstrations
- Fixing application advise
- Product installation training and certification
- On-site product testing

PRODUCT SPECIFICATION

Structnail® engages independent engineers specialising in steel frame construction for design advice, site support and relevant approvals in each state. Our engineering team is also available for presentation seminars (conducted at your office/facility) which deliver a comprehensive insight into the unique Structnail® product range, latest standards and industry developments.

TESTING LABORATORY

Structnail® and ICCONS® products have in-house and independent testing data across Australia and New Zealand in accordance with current standards.

COATING WARRANTY

ICCONS® Fastener PT2000™ PINS

ICCONS® is proud to offer a range of specialised, high quality, corrosion resistant Pins for the Australian steel construction marketplace. ICCONS® guarantees the Structural integrity of its PT2000TM Pins which includes the head and knurl area against the effects of corrosion or other metallurgical manufacturing defects in BlueScope® Truecore® or similar steel that meets AM150 coating and G550 tensile properties¹. ICCONS® references International Standard ISO 9223:2012(E) as guidance for establishing the Pin warranty periods and conditions referenced below. Atmospheric conditions, pollution levels, chemicals, humidity and wetness all have a large impact on the expected serviceable life of the screws, ISO9223:2012(E) provides guidelines to assist in determining the severity of the corrosive environment that ® PT2000™ Pins will be exposed to. ICCONS® follows ISO 9223:2012 (E) Categories C2 to C3 and will warrant the structural integrity of the Pins for the period indicated in each category. It should be noted the ICCONS® Warranty covers the structural integrity and performance of the entire Pin (head and threaded knurl area) and does not include the aesthetic appearance of the coating.

Corrosivity Category - ISO 9223:2012(E) Annex C									
	C2 Low	C3 Medium	C4 High	C5 Very High	CX Extreme				
Exposure Type	Temperate Low Pollution Short Term Wet	Temperate Mild Pollution Low Industrial	Temperate Mild Pollution Low Marine Mild Industrial	Subtropical High Pollution Mild Marine Severe Industrial	Tropical Climate Extreme Pollution Severe Marine Extreme Industrial				
Location Guidance	20km from Ocean	3km from Ocean	1-3km from Ocean	150m from Ocean	Breaking Surf				
Coating		Warranty Period (years)							
PT2000 [™] AeroGOLD	30	25	NR	NR	NR				

NR = Not Recommended

Australian Standard AS/NZS 2312-2002 states that it is "very difficult if not impossible, to predict accurately the aggressiveness of a given environment and a certain amount of educated judgement is required to assess its Category, an inspection of the local environment, the building type and the condition of similar structures in the area is usually necessary. Pin selection should always be suitable for both the application intended and be fully compatible for use with the other materials in the build. PT2000™ Pins are suitable for use with BlueScope®, Truecore® and/or other comparable steel. The table above is meant as a guide only to aid in the selection of appropriate Pin material / coating for the application and conditions of the intended use. Always check with recommendations from relevant fabricators for material compatibility, if unsure seek professional advice.

ICCONS® WARRANTY is subject to the following conditions and limitations:

- ICCONS® Pins not exposed to rain are required to be washed down every 6 months.
- · ICCONS® Pins must be installed correctly as per any approved instructions by use of a pneumatic or gas approved tool.
- · Any warranty claim must be supported by full written details of the alleged defect, the date of installation, the application and build detail, location of the installation and proof of purchase.
- All ICCONS® Pins must be head marked.

ICCONS® Warranty does not apply and ICCONS® will not be made liable for (to the extent permitted by law) any defect or fault arising from the following conditions:

- · Damage caused by exposure to chemical agents, fumes, soils, ashes, fertilisers, liquids and solids other than natural rain fall.
- Incorrect Pin selection for the application or the environment they are used in.
- Tempest, War or act of God.
- Incorrect Pin selection for the compatibility with other materials used in the build.
- · defects attributed to faulty installation methods including but limited to installation tools
- Improperly transported or stored fasteners
- The warranty is not transferable from the original owner of the structure on which the pins are used.

ICCONS® will warrant any Pins that are deemed to be defective after inspection of the specific project and consideration of the above criteria.

To the extent permitted by law, ICCONS® will not be liable for any loss or damage caused (including consequential or special loss or damage) whether by negligence or otherwise which may be suffered or incurred by any person or which may arise directly or indirectly in respect of the supply or use of the products or otherwise under or in connection with the warranty.

Our Goods come with guarantees that cannot be excluded under the Australian Consumer Law. You are entitled to a replacement for a major failure and for compensation for any other reasonably foreseeable loss or damage. You are also entitled to have any goods repaired or replaced if the goods fail to be acceptable quality and failure does not amount to a major failure

ICCONS® Coating Warranty: Refer to latest ICCONS Product Guide for screws

¹ TRUECORE®G550 steel with Activate[™] technology, Revision 1 Jan. 2014

DESIGN PERFORMANCE SPECIFICATION DATA

ICCONS® Gripshank™ SuperSharpy™ PINS

ICCONS® is proud to offer a range of specialised, high quality, corrosion resistant Pins for the Australian steel construction marketplace. ICCONS® guarantees the Structural integrity of its Gripshank™ Supersharpy™ Pins into a wide range of steel fixing applications in BlueScope® Truecore® or similar that meets min. AM150 coating and G550 tensile properties.

Fastener Description		→ ←	→ ←
Description	mm	mm	mm
Gripshank™ Supersharpy™	38 - 65	2.5	6.4

Gripshank[™] Supersharpy[™] Design Capacities

ВМТ	0.55mm (G550)	0.75mm (G550)	1.00mm (G550)	1.20mm (G500)	1.50mm (G500)
Pullout ¹	0.55 kN	0.85 kN	1.04 kN	1.42 kN	1.69 kN
Shear²	1.00 kN	1.85 kN	2.75 kN		

Gripshank[™] Supersharpy[™] Applications

Fixing Application	Suitable Substrate	Thickness Notes
Timber Flooring	0.75mm to 1.6mm BMT	Not suitable for CFC flooring
Lightweight Cladding	0.55mm to 1.6mm BMT (Shear) 0.75mm to 1.6mm BMT (Pull - out)	Ensure overal capacity equivalent to substituted screws. Refer to manufacturer for approval of nail as substitute to regular fixing. Pull - through testing not carried out.
Steel Lintel Plate	0.55mm to 1.6mm BMT (Shear) 0.75mm to 1.6mm BMT (Pull - out)	Ensure overal capacity equivalent to substituted screws
Strap Bracing	0.55mm to 1.6mm BMT (Shear)	Ensure overal capacity equivalent to substituted screws
Ceiling + Roof Battens	0.75mm to 1.6mm BMT (Pull-out)	Battens into 0.75mm Min Truss Chord Ensure overal capacity equivalent to substituted screws
Connector Brackets	0.55mm to 1.6mm BMT (Shear) 0.75mm to 1.6mm BMT (Pull - out)	Ensure overal capacity equivalent to substituted screws
Timber (direct fixed)	0.55mm to 1.6mm BMT (Shear) 0.75mm to 1.6mm BMT (Pull - out)	Ensure overal capacity equivalent to substituted screws

- Gripshank[™] Supersharpy[™] pull out testing has been carried out on 20 nail samples installed on two different C sections of each BMT material noted in the above table (10 tests on each section) as per section 8 of AS4600:2016 draft standard which is in line with Nash standard part 1 (and technical note 4). A coefficient of variation of 20% has been selected which conservatively allows for variation in nails, substrate or installation. Kt values of 1.29 for minimum results and 1.7 for average results have been applied to arrive at design capacities.
- GripshankTM SupersharpyTM shear testing has been carried out on 10 nail samples of each 0.55, 0.75 & 0.95mm BMT material (G550) as per the Shear Test specifed in section F4 of AS4600:2016 draft standard which is in line with Nash standard part 1 (and technical note 4). A coefficient of variation of 20% has been selected which conservatively allows for variation in nails, substrate or installation. Kt values of 1.49 for minimum results and 1.77 for average results have been applied to arrive at design capacities.

Where GripshankTM SupersharpyTM nails are used in accordance with above capacities and meet manufacturers specifications, the nails are capable of providing a resistance suitable for above applications. It is important for specifier to ensure the number of nails used provides an equivalent capacity to the screws noted in each products manual. Please note that no pull-through testing has been carried out in relation to external cladding systems at this time and it is important to refer to manufacturer for advice in relation to use with such systems to ensure compliance.

- The consumer must ensure that Structnail® specialised steel fasteners and information contained in this document is reviewed and approved by a design professional responsible for the application and/or building products manufacturer to ensure equivalency to substituted screws and compliance prior to use of the fasteners (pins).
- Design performance specification data is based on correct installation and use of correct specified installation tools as described in this document and referenced on the Structnail® website www.structnail.com
